

Controlled components:

```
import React, { Component } from 'react';  
  
//import SearchForm from './components/SearchForm';  
  
//import Parameter from './components/Parameter';
```

```
class Form extends React.Component {  
  
  constructor(props) {  
  
    super(props);  
  
  
  
    this.onChange = this.onChange.bind(this);
```

```
    this.state = {  
  
      name: 'hhhhhhh'  
  
    };  
  
  }  
  
  onChange(e) {  
  
    this.setState({  
  
      name: e.target.value  
  
    });  
  
  }  
  
  render() {  
  
    return (  
  
      <div>
```
